This diagram shows a cross-sectional view of a second embodiment of the device. It features a base layer 102' with a central opening. A vertical post 136 passes through this opening. Below the base layer 102' is another layer 103'. A component 132 is positioned below layer 103'. A vertical post 134 is located to the left of post 136. A bracket 141 groups two horizontal components, 142 and 144, which are positioned between the two base layers. Another bracket 145 groups two horizontal components, 146 and 148, which are positioned above the base layer 102'. The components 142 and 146 are shown with hatching, while 144 and 148 are shown with vertical lines.
